

Specifications

Product Name: 2 in 1 Ozone & Negative Ion Air Sterilizer + Air Purifier
Input: 5V 2000mA
USB output: 5V 1000mA
Rated power: <12W
Negative ion release: 10million pcs / cm ³
Ozone release: 50mg / H
Battery capacity: 2000mAh
Noise: <30dB
Applicable space: <10m ²
Color: Black, Silver
Fan: DC quiet fan
Structural parts: ABS
Body Material: Aluminum Alloy
Craftsmanship: Anodizing
Dimensions: H:154mm D:65mm
Applicable environment: -10 ° C ~ 45 ° C
Accessories: One Micro USB cable, 1m Length

Features

1. Ozone (Sterilization, Disinfection, Deodorization and Formaldehyde Removal)

Ozone (O3) can remove toxic and harmful gases such as bacteria, formaldehyde and odor.

2. Negative Ion (PM2.5, Pollen, and Smoke Removal)

Adopt 10 million negative ion generator, negative ion has extremely strong adsorption capacity, and has the functions of removing PM2.5 and smoke, improving air quality.

3. Vertical Air Duct Design

Vertical air duct design make larger air volume and higher purification efficiency.

4. Automatic Start/Stop, Optional Function, Adjustable Gear

Once start the car to automatically start the purification function, two-speed adjustable air volume and negative ion release; the negative ion and ozone functions can be freely switched.

5.USB Design

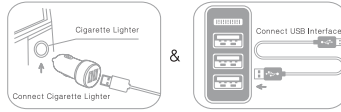

Power by Micro USB input and Dual USB output which can be used for charging mobile phones and other electronic devices.

6. Aluminum Design

The incrustation adopts 12mm high-hardness aluminum alloy shell, which is sturdy and durable. After anodizing, it is beautiful and texture.

Operating Instructions for Plugging In

1. Connect air purifier with USB cable.

2. After power on, the purifier will automatically activate the negative ion purification function at first gear, the wind speed is at one gear, and the blue light is on.

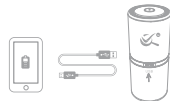

3. Lightly press the key to adjust the gear to the second gear, the wind speed is accelerated, the negative ion purification is strengthened, the blue light is on, and then press the key to turn off.

4. Press and hold the key for 2 seconds to turn on the ozone sterilization function and the orange indicator will flash; Press and hold the key for 2 seconds again to turn off the ozone function, the indicator light off and purifier shutdown.

5. When the device is running, each USB outlet can independently charge mobile phones and other electronic devices.

Operating Instructions for Built-in Battery

1. Please charge for about 30 minutes before using purifier for the first time.

2. Lightly press the key, the purifier will activate the negative ion purification function at first gear, the wind speed is at one gear, and the blue light is on.

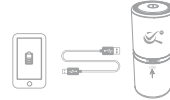

3. Lightly press the key to adjust the gear to the second gear, the wind speed is accelerated, the negative ion purification is strengthened, the blue light is on, and then press the key to turn off.

4. Press and hold the key for 2 seconds to turn on the ozone sterilization function and the orange indicator will flash; Press and hold the key for 2 seconds again to turn off the ozone function, the indicator light off and purifier shutdown.

5. When the device is running, each USB outlet can independently charge mobile phones and other electronic devices.

NOTICE

- In order to ensure the safety, it is recommended that using the negative ion function when people in the car, **turn on the ozone function when the person leaves.**
- The ozone function is set to start running after a delay of 60 seconds. After the ozone function is turned on, make sure the environment is unmananed.**
- When using the built-in battery, the negative ion function will automatically shut down in 60 minutes; and the ozone function will shut down automatically in 15 minutes. If you want to use the ozone function multiple times, please stop it for 5 minutes and then turn it on again.
- It is forbidden to fill the device with liquid.

2 in 1 Ozone & Negative Ion Air Sterilizer + Air Purifier

Anion | Ozone | Auto Start | 2 in 1 | Two Speeds
