

# AIR PURIFIER

OPERATION INSTRUCTIONS

AIR PURIFIER

## Tips

Respected user:

Thank you for choosing our air purifier products.

Before you use our air purifier, we sincerely recommend that you read this instruction manual to help you use this product more standard and more rationally, so that our products can serve you more effectively.

If you have any questions during use, please read this instruction manual carefully.

You are welcome to give us valuable feedback on our products.

Special statement:

1. The pictures in this manual are for reference only, please refer to the actual product;
2. If there is any technical change in the product in the future, the appearance and color of the product are subject to change without prior notice;
3. This manual has been carefully proofread. If there are any errors or misunderstandings in printing, the company reserves the right of final interpretation.

## Part Name

## INDICATOR MAP

## Instructions

Connect the product to a suitable power outlet and be ready.

### 1. On/Off

**Power on:** Tap the remote control on/off button to start the product. The product will run at 2 speeds by default each time the product is started.

**Shutdown:** Press On/Off again to turn off the running product.

### 2. Wind speed selection

Select the desired wind speed by mode.

1) **General mode operation:** When the flow of people is small, it is recommended to use 2 speeds.

2) **Quiet mode operation:** It is recommended to use 1st speed.

3) **High-efficiency mode operation:** When indoor pollution is high or there are many people, it is recommended to use 3 speeds.

### 3. Timing settings

There are 4 time selections for 1H, 2H, 8H, and 12H at regular intervals. Press different buttons to display the corresponding values on the digital screen.

4. **Negative ion switch,** after pressing the button, the digital screen displays the negative ion word.

## Warranty guide

To protect your rights, please pay attention to the following:

1. Please fill out the warranty guide (special attention to fill in the product traceability number);

2. Please ask for the purchase receipt or the company's special collection receipt. The warranty period starts from the date of invoicing;

3. Please use the original accessories provided by the company;

4. Non-professional professionals are not allowed to install or disassemble without permission. Otherwise, the company does not assume any responsibility for malfunction, damage or personal injury caused by improper operation;

5. If there is any abnormality or malfunction in the initial stage of your air purifier, please turn off the power in time and contact the local agent or company customer service;

6. This air purifier is subject to engineering changes or technical improvements without prior notice.

## Cleaning and maintenance

1. Unplug the power supply before cleaning the filter
2. Cleaning the product itself

Use a soft, dry cloth to clean the dust and dirt on the surface. Tip: If the contamination is serious, use a damp cloth to gently wipe the surface, but do not use rough materials.

3. Cleaning product inlet and outlet

Use a soft brush to remove dust that has accumulated in the air inlet and outlet.

## Fault and treatment

Problem	Solution
Product does not work properly	Please check if the product power is on and turn on the product.
No air outflow at the air outlet	Please check if the product power is on and turn on the product.
This product has been in operation for some time and air quality has not improved	Perhaps the indoor air is too polluted for a long time, and if necessary, the amount of this product can be added or used for a longer period of time.
The product makes an abnormal sound	Please be sure to remove all packing materials from the filter.
	Make sure that the air inlet and outlet are not obstructed or blocked by objects. Remove the blockage.
	If the product has abnormal operation, please contact customer service center or authorized dealer.

## Safety Precautions

This product cannot be used alone by children, persons with disabilities, sensory or mental illness or inexperienced individuals. In order to use this product safely, please read the instructions on a fully understood basis and follow the relevant matters and contents. This manual classifies safety matters as "warning," "attention," and "prohibition," so be sure to follow them. They are important to ensure safety.

 <b>Warning</b>	Indicates content that may cause death, serious injury, or property damage
 <b>Note</b>	Indicates content that may cause injury or property damage
 <b>Ban</b>	 <b>Ensure compliance</b>

## Ban

- Do not use the power cord or plug if it is damaged or plugged into a power outlet.
- Do not use the power supply to be damaged.
- Do not bend, pull, twist, or bundle the power cord. Do not carry heavy objects or pinch on it.
- Do not use wet hands to plug in or unplug the power cord or operate the machine.
- Do not modify, disassemble or repair the machine without authorization.
- Do not insert your fingers, sticks, etc. into the air outlet or air inlet, otherwise it may cause abnormal work or electric shock.
- Do not install the machine in a damp and foggy room, such as a bathroom.
- Do not use this product in a dusty environment or in an environment where oil (such as oil) is overflowing.
- Do not use in an environment that is flammable, explosive, corrosive, flammable or metal dust.
- Do not use solvents such as gasoline or chemicals, do not spray insecticides.
- Do not place near flammable objects or lit cigarettes.
- Do not operate this product when using indoor fumigation (smoke-type) insecticides.
- Do not place the machine in an unstable, inclined plane.
- Do not use the machine for exhaust fumes and ventilation in the kitchen.
- Do not tilt or tilt the machine.
- Do not move while the machine is in use.

## Safety matters

1. Apply the voltage indicated on the nameplate to ensure that the power plug is connected to the correct power outlet.
2. If the cord is damaged, it must be replaced by the manufacturer or a qualified service agent.
3. Please make sure the power socket is connected properly, the plug will not load and heat up.
4. Please ensure that the product and the adjacent wall or item are at least 20 cm away, and the upper air outlet is at least 30 cm.
5. Use only original filters designed by the company specifically for this product. Do not use any other filters. Do not push, lean, press, bump, or insert sharp objects into any part of the product.
6. Please cut off the power before cleaning or maintaining this product.

## Instructions

1. Read the instruction manual carefully and save it for future reference.
2. Remove all packaging and clean all removable parts with a soft, dry cloth inside the product.
3. Place the product on a dry, stable and smooth level and ensure that the product provides a reasonable space of no less than 20 cm for proper operation.
4. Before inserting the plug, please check that the power socket and extension cord have been confirmed to meet the product requirements.
5. When using the negative ion function of this product, in the extremely quiet situation, there will be a slight "sweet" sound, which is normal. This is due to the negative ion generator being activated, releasing a large amount of negative ions.
